Irganox 1135. Irganox 1135 sds. Irganox 1135 tds.

It is hindered phenolic primary antioxidant for processing and long-term thermal stabilization. A free account includes access to hundreds of thousands of detailed technical datasheets. ANTIOXIDANT 1135 can be added before, during or after polymerization. Excess exposure to the product should be avoided. By continuing to use this website you agree to our use of these cookies. Used for the stabilization of polyurethane flexible foams. Create Your Free Account Phenolic primary antioxidant for processing and long-term thermal stabilization Irganox 1135 is a 100 % active, liquid sterically hindered phenolic antioxidant for polyols, polyurethanes, and other polymers. For the stabilization of PV flexible slabstock foams, it prevents the formation of peroxides in the polyol during storage, transport, and further protects against scorching during foaming.
